### **Detailed Action**

1. Claims 1-14 are presented for examination. This office action is in response to the amendment filed on 06/15/2006.

### ***Specification***

2. Applicants are requested to update the status of the related U.S. patent application, accordingly (e.g., U.S. Patent Application Serial No. #####,### filed Sept. 07, 1990, now abandoned; ..., now U.S. Patent #,###,### issued Jan. 01, 1994; or This application is a continuation of Serial Number #####,###, filed on December 01, 1990, now abandoned; ...etc.). Also applicants are requested to include the status of the related U.S. applications or patents in the CROSS-REFERENCE TO RELATED APPLICATIONS section and in any other corresponding area in the specification, if any.

### ***Information Disclosure Statement***

3. Applicants are reminded of the duty to disclose information under 37 CFR 1.56.

### ***Drawings***

4. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because a reference number -14— is missing for a black box "screen" in Fig. 1; "BACK" should be changed to -BACKUP—in Ref. 34, Fig. 1; and a label for Ref. 24 is missing in Fig. 1. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no

longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

### **REASONS for ALLOWANCE**

The following is an Examiner's statement of reasons for the indication of allowable subject matter: claims 1-14 are allowable over the prior art of record because an update of a search previously made does not detect the combined claimed elements as set forth in the claims 1-14. As to claims 1-12, claims are allowable over the prior art of record because none of the prior art of record teaches or fairly suggests a computer system and computer program storage product for backing up a program and a plurality of user instances of the program, the system or program storage product comprises means for backing up definition of queues used by the plurality of user instances of the program; means for backing up authorization for the queues; means for backing up a plurality of program instance configuration files for the plurality of program instances, respectively; and means for backing up a configuration file for the program as described in the specification and together with combination of other claimed element as set forth in the claims. As to claims 13-14, claims are allowable over the prior art of record because none of the prior art of record teaches or fairly suggests a method for backing up a user instance of a program which instance has locked a queue definition file containing definitions of queues and authorizations for accessing the queues, and which has not locked a configuration file identifying the instance, the method comprising the

steps of: a backup program querying the instance for the definitions of the queues and the authorizations for the queues such that the instance retains the lock on the queue definition file, and in response, the user program reading the definitions and authorizations from the queue definition file and furnishing them to the backup program; and the backup program directly reading the configuration file without querying the user program for the configuration file and without locking the configuration file as described in the specification and together with combination of other claimed element as set forth in the claims. Therefore, claims 1-14 are allowable over the prior art of records.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons For Allowance."
